in Kamogelo Molamu

Objective

I am a passionate and motivated IT student with a strong interest in Web Development and BusinessAnalysis. I have a strong grasp of project management and process analysis, and i excel in translating business needs into effective technical solutions. Known for my problem solving abilities, analytical thinking and attention to detail, I aim to contribute to innovative, user-focused systems. I am seeking opportunities to apply and grow my technical and analytical expertise in dynamic, team oriented environments.

Education

- **Vaal University of Technology**   2023 - 2025
  Diploma in Information Technology

- **Batswana Commercial Secondary School**   2018 - 2022
  National Senior Certificate

Skills

- Microsoft Office Suite [Word, Excel, PowerPoint, and Outlook]
- Basic programming [VB.net and Java]
- Web Development [HTML, CSS, PHP, and JavaScript]
- Database Management [MySQL and Oracle]
- Problem Solving and Critical thinking
- Analytical Skills
- Research and Information Gathering
- Project Planning and Management
- Team Collaboration and Communication
- Active Listening

Projects

- **Portfolio Website (Personal project)**
  Developed a personal portfolio website to showcase my projects and skills using HTML, CSS, and JavaScript. Focused on clean, responsive design and interactive user experience.
- **Tutor Matching Website (Academic Project)**
  Developed a responsive website that connects students with tutors and allows individuals to register as tutors. Built using HTML, CSS, and PHP, with MySQL for database management. Implemented features for user registration, tutor search, and profile management. Focused on usability, clean interface design, and efficient database queries to enhance user experience.
- **Student Registration System (Academic Project)**
  Created a Java-based system enabling students to register for subjects, search enrollments, and cancel registrations. Applied a three-tier architecture (Problem Domain, Data Access, and GUI) with file I/O and exception handling to ensure system reliability and maintainability.
